Biologging surveys on habitat use of dugongs in the northern Dungonab Bay, Sudan

Research participants
Kotaro ICHIKAWA (RIHN)
Abdelmoneim Karamalla Gaiballa (RSU)
Badereldin Kharafalla Adam (RSU)

1. Introduction and Objectives

The biologging survey provides us the behavioral information of the dugongs. Based on the information, the home rage of the dugongs and their favored marine areas can be estimated. In this paper, results of biologging surveys on habitat use of the dugongs in the northern Dungonab Bay will be reported.
